

Thanks so much for purchasing one of our Boom Blasters products!

Components and Installation Instructions

General Information: This wireless remote control system is used to turn ON our positive trigger 12V horn models to make them wireless, so you do NOT need to hook it up to a momentary button.

(NOTE: This product is NOT waterproof, so be sure to mount it in a dry location)

Some hands-on skills are required for installation of this product.

Check out our video explaining exactly how this wireless remote kit functions and how to hook it up.

TIP: Read through entire instructions before beginning the process of installing this kit.

Boom Blasters Components

Components Included:

1. 2 x Remote Controls
2. 1 x Wireless Receiver
3. Instructions Manual

Tools - Parts Needed (not provided):

1. Small flat head screw driver
2. Small speaker wiring (length may vary, depends where you mount the unit on the amount of wiring that will be need)
3. Wrench or suitable tool to connect power wires to battery
4. Mechanical tape or suitable tape to seal the wire connections
5. A few tie downs straps to safely secure the wiring.
6. Plastic bag to wrap the receiver unit into after you get it wired... a grocery bag will do!
(this will help keep moisture out of the receiver unit)

Installation should take around 20 to 30 minutes.

Caution! Caution! Caution! Caution! Caution! Caution! Caution!

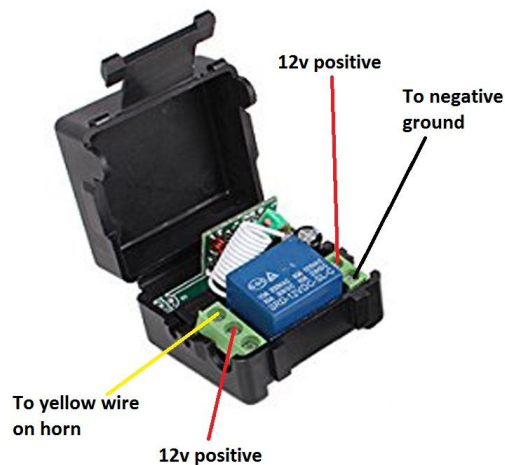

1. Do not install this unit while the vehicle is running!
 2. Secure the unit properly and ensure the unit and all wiring are clear of any moving parts (i.e. fan belts, etc.) or items that can cause damage to the unit.
-

Installation Instructions

NOTE: If you do not feel comfortable installing this wireless receiver kit, seek qualified professional assistance.

Battery Connection

- a. Install the receiver unit in the engine compartment close to the battery and away from any moving parts or areas that may cause damage to the unit or the vehicle. **(The wiring harness red and black wire needs to be able to reach and connect to the battery.)**
 - b. Connect your black wire to the negative (-) side of the battery.
 - c. Connect your 2 red wires to the positive (+) side of the battery.
 - d. Connect your yellow wire to the yellow wire on your horn unit.
- 1) **Ensure all connections are tightened properly!**
 - 2) **Route the receiver wiring neatly away from any moving parts to prevent damage.**

Remember our wireless kit is NOT waterproof, so be sure to mount it in a dry location.

That's it! now go and hook up your wireless remote kit.

If you are having troubles understanding the above procedures, then please refer to the tutorial videos that are right here for you to watch!
